

CLAIMS

What is claimed is:

1. A device for maintaining position of a piece of jewelry, comprising:
a strip of flexible material having a first end, a second end and a middle portion between the first and second ends; and,
a fastener having first and second components, the first component being coupled to the first end of the strip of flexible material and the second component being coupled to the second end of the strip of flexible material.
2. A device, as set forth in claim 1, the strip being made from a flexible material that floats.
3. A device, as set forth in claim 1, the strip being made from a synthetic rubber material.
4. A device, as set forth in claim 1, the strip being made from neoprene.
5. A device, as set forth in claim 1, the fastener being infinitely adjustable.
6. A device, as set forth in claim 1, wherein the first and second components are fixed to a respective end by at least one of threads and glue.
7. A device, as set forth in claim 1, the first portion component being fixed over any portion of one side of the strip and the second component being fixed of very any portion of another side of the strip.

8. A device, as set forth in claim 7, the any portion of the one side and the any portion of the other side being a whole of the respective side.

9. A device, as set forth in claim 7, the any portion of the one side and the any portion of the other side being less than a whole of the respective side.

10. A device, as set forth in claim 1, wherein the fastener comprises a button and button hole.

11. A device, as set forth in claim 1, wherein the fastener comprising a hook fastener.

12. A device, as set forth in claim 1, wherein the strip includes a slit.

13. A device, as set forth in claim 12, the slit being between the first and second components.

14. A device, as set forth in claim 1, the strip having an oval shape.

15. A device, as set forth in claim 1, the strip having a rectangular shape.

16. A device for maintaining position of a piece of jewelry, comprising:
a strip of flexible material having a first end, a second end and a middle portion between the first and second ends; and,
a fastener for coupling the first and second ends of the strip, the fastener being infinitely adjustable.
